FOREWORD

Knowledge is power and the human mind is a power seeker, Innate curiosity to know the unknown has led mankind to probe and experiment constantly.

Research has always been a source of excitement and incalculable benefit to society. Research is incomplete until its results have been communicated. Preferably this is best done in print.

The present society can only progress if it has access to logical self explainable and easily accessible knowledge database.

This has great significance in higher education specially for those who are doing their research in different areas. For them this data base is a unmatched treasure in their particular field of study.

Doctoral studies 2000-2009 is an attempt to document the contributions of various research scholars of Barkatullah University, Bhopal over the millennium years (2000-2009). This book is intended to be a handy book for the research scholars working in the jurisdiction of this University and various parts of the country.

I take this opportunity to Congratulate the Chairperson and members of the editorial board as well as others who have contributed to bring this publication in the present shape.
